

Although we must keep our distance,
let's remain close at heart...

STOP Coronavirus Discrimination

Unjustified discrimination, prejudice, bullying, and criticism of the families etc. of those returning home from abroad, individuals from certain countries, those who work to provide services that are essential for everyday societal life, medical professionals, those who have come into close contact with the infected, and those people who have been infected with New Coronavirus, is absolutely unacceptable.

It is vital that we all act compassionately towards each other.

Let's end the negative cycle of discrimination and prejudice regarding New Coronavirus infection, which can cause hesitation towards undergoing examinations and subsequently lead to further spread of infection.
